## Alloy Wheels

### Technical Description

AC Schnitzer alloy wheels are available in various designs and styles. We distinguish between one-piece (monoblock) and multipiece racing rims. The various AC Schnitzer wheels come in different finishes depending on model: 1. with silver lacquered or 2. black wheel centre and 3. in two colours as "BiColor" wheels. Designs are available with rolled stainless steel ring or cast wheels, or with welded forged bed. The AC Schnitzer alloy wheels come in sizes from 7.0J x 17" to 10.5J x 22" depending on model.

### Benefits for the Customer

#### More agility

- > Less unsprung mass.
- > Acceleration and deceleration of lower masses.
- > Use of more sporting, low profile tyres.

#### More safety

- > Higher safety reserves, higher limit zone.

#### More driving pleasure

- > Exclusive appearance, sporting driving properties, no loss of comfort.

***beyond the standard.***
