S 1000 RR Avoid Silence by AC Schnitzer

"Avoid Silence" - the phrase perfectly describes the S 1000 RR by BMW. With its loud roar, it has turned the Superbike world inside out.

Sporting yet comfortable describes the new **Superbike handlebar conversion by AC Schnitzer**. Totally in black, it harmonizes perfectly with all BMW colours. The Superbike handlebar conversion includes everything necessary for installation, designed for the standard equipment level of the S 1000 RR. To match, there is a new brake fluid reservoir which is a real eyecatcher with its striking filigree design.

Perfect control and stylish design are provided by the adjustable **AC Schnitzer brake and clutch levers**. Made of high strength aerospace aluminium, they have a wide adjustment range to ensure the perfect grip even for small hands. The shade is called Titanium, and perfectly suits its refined finish. These approved levers are available in a short version as well as the original length.

New aspects at the rear entrance the observer both visually and acoustically. For the road, there is the AC Schnitzer **STEALTH** silencer with EC approval, which gives the AC Schnitzer S 1000 RR Avoid Silence the final visual and acoustic finishing touch. Its matt black surface and carbon cap ensure it harmonizes perfectly with the overall aesthetics - and it weighs in at just over 1 kg.

A better view of the rear wheel is possible thanks to the stable stainless steel registration plate holder which bolts onto the standard support. Without registration, it fulfils all requirements for legal fitment and can be used both with standard flashers and most accessory components.

The Performance Sports Air Filter by AC Schnitzer for the S 1000 RR ensures a higher through-flow and perceptible power increase, in particular when used in conjunction with an AC Schnitzer or other accessory exhaust system. This special filter does not need replacement, but can be re-used after cleaning.

One totally new development is the AC Schnitzer crash pads, which with an innovative 3D design not only effectively prevent drop damage but also fit perfectly into the design language of the BMW Superbike.

As for all BMW models, the S 1000 RR can also be fitted with adapters for larger mirrors to ensure good rearward visibility but who would be coming from there?

Further components are currently in development and will shortly be available as usual from BMW motorcycle dealers or direct from AC Schnitzer, Tel. 0241 5688-300 or e-mail info@ac-schnitzer.de.

Copies free! Please send us a proof copy! Thank you!
AC Schnitzer is certified to DIN EN ISO 9001:2000
