April 2009

### The AC Schnitzer BMW K 1300 S – Speed & Power

Like the K 1200 S, the focus of the K 1300 S lies on both performance and suitability for everyday use. After the first extended test ride, the development criteria were clear for the AC Schnitzer engineers: find a seating position in which the body weight is not always supported by the lower arms, while still retaining sporting attributes. This seating position was achieved with the new Superbike handlebar conversion, which brings the handlebars around 7 cm higher and closer to the rider.

Better rearward visibility is achieved with the AC Schnitzer wide view mirrors - fully approved - which sit unobtrusively below the mirror base. The AC Schnitzer brake and clutch levers are also fully approved: these can be adjusted individually and are also available for most other BMW machines.

Delicate spokes and optimum weight are combined in the new ultralight ACS I forged wheels in sizes 3.5 & 6.0 x 17". A set weighs just 8 kg, and in conjunction with the Superbike handle bar conversion, ensures better machine control and hence cornering performance.

The acoustic signals are provided by the AC Schnitzer STEALTH silencer with EC approval, which with its motorsport provenance further emphasises the sporting lines of the K 1300 S. The silencer is fitted with a removable DB killer and can be provided complete with catalytic converter.

For the single colour K 1300 S models, AC Schnitzer offers a matt black sticker set for the sides which clearly indicates its orientation. So it's ideally suited to the nature of the BMW K 1300 S and offers an interesting and attractive alternative to the two-colour paintwork which comes at an extra cost.

Already known from the 1200 Boxer models, the AC Schnitzer cardan crash pad is now also available for the K series. A low price, but highly effective in the event of a "faller".

All components are available as usual via your BMW motorcycle dealer or direct from AC Schnitzer, Tel. 0241 5688-300 or e-mail [info@ac-schnitzer.de](mailto:info@ac-schnitzer.de).
