July 2009

We've improved deceleration: The new AC Schnitzer high performance brake system for all MINI Cooper S

Ever since the MINI was launched, it's been a strong member of the **AC Schnitzer** product range. Enough reason for the AC Schnitzer engineers to exploit the potential of the MINI Cooper S models (R55, R56, R57, R52, R53 and John Cooper Works) even further in a new project.

Enjoy driving comfort to the full without restriction, and be prepared for every situation: thanks to the **High performance brake system** by **AC Schnitzer** for the MINI Cooper S (R55, R56, R57, R52, R53, JCW).

The high quality brake system has excellent performance figures which are normally only found on sports cars. In combination with the height-adjustable **Racing suspension** - thoroughly tested on the Nürburgring North Loop - and the **AC Schnitzer limited slip differential** (locking 0 – 75%), driving pleasure with excellent ground adhesion is guaranteed. The MINI Cooper S will make the heart of every sports car fan beat faster.

The new **brake system** uses **4-pot fixed calipers** on the **front axle**. Fast and precise response is guaranteed by the slotted, internally vented discs.

At the same time, the high performance brake system from **AC Schnitzer** delivers excellent deceleration even under sustained use, in both extreme heat and driving rain.

The generously dimensioned **brake discs** in **328 x 28 millimetres** bleeds off the speed energetically even after 20 downhill bends, while the pressure point remains stable.

The new AC Schnitzer high performance brake system is available for all current body styles of the new MINI Cooper S models (current and previous generation). It consists of: 4-pot fixed caliper brake, 2 brake discs, 4 pads, 2 brake lines and 2 holders.

Technical data	MINI Cooper S by AC Schnitzer	MINI Cooper S (Standard)
Type	4-pot fixed calipers	1-pot floating caliper
Brake disc size	328 x 28 mm	294 x 22 mm
Slotted/perforated	slotted	no
Internally vented	yes	yes
Braking distance		
from 100 km/h (cold)	35.5 m	37.1 m
from 100 km/h (warm)	35.2 m	38.2 m
