beyond the standard.

## AC2 Light Alloy Wheels for BMW X3 in 22" Innovative design down to the smallest detail

The AC Schnitzer AC2 light-alloy wheels with ten-armed, stylized Y-spokes, which are reminiscent of the tentacles of an octopus, are unique in appearance. Manufactured using the low pressure casting process with subsequent heat treatment, the shaped rim star of the 22 inch monoblock rim offers a clear view to the brake.

The centre of the head-footer forms the hub cap of the AC2 alloy rims in classic, pentagonal form with the AC Schnitzer logo. As with the Octopus, the „brain“ of the light alloy rims is not only in the head, but is also branched into the outermost components. Designed especially for SUV vehicles and protected against corrosion with high-quality clear varnish, the AC Schnitzer AC2 light alloy rims offer innovative, high-quality design down to the smallest detail and a guaranteed, long service life coupled with unlimited everyday usability.

In BiColor Silver/Black or in Black/Anthracite, the AC Schnitzer AC2 light alloy rims are now also available in 9.0J x 22" offset 18 with raised original AC Schnitzer logo for BMW X3 (G01) and X4 (G02) and with tyres in the size 265/30 R22.

AC Schnitzer AC2 Light Alloy Wheels BiColorAnthracite/Black for BMW X3  
front axle: 9.0J x 22" offset 18 with tyres 265/30 R22  
rear axle: 9.0J x 22" offset 18 with tyres 265/30 R22

The wheels not only physically but also optically connect a car to the road.

**„That's why it's very important to have the right dimensions between the proportions of the rims to the bodywork,“ explains AC Schnitzer chief designer Michele Viandante.**

AC Schnitzer shows again and again that beyond the standard production, even more driving pleasure is possible not only through extensive tuning programs, but also through the development of innovative and unique individual parts.

The tuning specialist for BMW, MINI, Jaguar and Land Rover brings the weight-optimised AC2 alloy wheels also for BMW X3 (G01) and X4 (G02) on the market.
